EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Scott Mckeown Reg# 42866 on 7/18/06.

The application has been amended as follows:

As claim 13, line 14, -- in the assigning the drop probability to each packet, maximum drop probabilities max_p_in and max_p_out for in-profile packets and out-profile packets are not exceeded; and wherein -- has been inserted between "wherein" and "max_p_out".

Allowable Subject Matter

2. Claims 1-25 allowed.
3. The following is an examiner's statement of reasons for allowance:

As claim 1, the prior arts in the record fail to disclose or make obvious to a method of active queue management comprising reclassifying a packet of the traffic of the packet transmission system, tagged as in-profile, as out-profile, when a drop probability assigned to the packet is greater than a drop probability calculated from an average queue length for in-profile packets within a structure of the claim.

As claim 2, the prior arts in the record fail to disclose or make obvious to a method of active queue management comprising reclassifying or dropping the packets of the traffic in a

queue of the transmission system by using the plurality of threshold levels and the maximum threshold levels of the queue within a structure of the claim.

As claim 13, the prior arts in the record fail to disclose or make obvious to a method of active queue management comprising retaining all packets with their initially assigned drop precedent levels while the avg_ql is less than, or equal to, a threshold th_in; assigning a drop probability to each packet, determined from the average queue length; retaining all packets while the avg_ql is less than the th_in; and dropping packets in accordance with their assigned drop probability wherein in the assigning the drop probability to each packet, maximum drop probabilities max_p_in and max_p_out for in-profile packets and out-profile packets are not exceeded; and wherein max-p-out is greater than max-p-in, max-p-out being the maximum drop probability of packets marked as out-profile and max-p-in being the maximum drop probability for packets marked as in-profile within a structure of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
